

## FAREWELL TO OUR OLD WEB SITE

All good things come to an end and the service provided by our previous web site has been superb during the last 15 years. During that time IRQAO has continued to grow and mature in some significant areas: -

Our scope of registration is much broader and our operations more global.

Although located in the UK we are far more extensive worldwide. We have updated our logo to reflect a searcher's magnifying glass whilst still retaining our fundamental and recognisable identity.

### Welcome to the International Register for Quality Assessed Organisations

The International Register of Quality Assessed Organisations (IRQAO) was established in 1997 to provide a reference of organisations whom hold certification validating the quality of their processes, products or services.

To ensure stringent quality control we only list certification or quality assurance which has been awarded by a credible third party assessment body, or personnel who have achieved academic qualification in a field related to quality assurance.

The search engine of this site is not exhaustive and results can include listings of certified organisations registered within any accreditation regime and other bona fide international listings.

If you wish for yourself or your organisation to be listed then please click here to submit your details.

[Terms & Conditions for use of this web site.](#)

We hope visitors like our new web site and welcome your feedback via our contact pages to our head office. So for the present 'farewell to the old and hail to the new'.
